

# 1700 Calorie Menu Option

Welcome to the program! We're excited to get started.

You've chosen the 1700 calorie option. There is also a 1500 and 2000 calorie option for classic plan. Please note that there is a re-feed day once every two week where your calories will go up to 2200 calories (500 calories of additional carbohydrates).

The classic plan is meant for those that would like to lose at least 10lbs+ while maintaining / adding curves. If you do not have the right plan, you can change it at any time at no additional cost. Our goal is for you to get your best results.

Here is a quick summary of how the program works:

## Overview

- low carbohydrate/low sugar count for weeks 1 & 2
- week 3 & 4 carbohydrate goes up
- lactose free
- gluten free
- low sugar - roughly 20-40g/day
- grain free weeks 1, 2 & 3 (to address possible carb sensitivity, gluten free stuff in wk 4)
- 1 re-feed day every two weeks
- week 1 add morning fibre/colon cleanse
- weeks 1&2 (optional) add parasite killer supplement or kit. Also optional, if doing either of

these cleanses: add lemon emena (lemona) or colonics on continue with a fiber supplement to ensure you are moving things out which will assist in less headaches, fatigue etc. that may occur due to cleansing

## Goals

- reduce sugar cravings & rebalance blood sugar
- reduce candida issues/ parasite issues
- restore energy
- lose fat
- reset your body as a fat burning machine
- re-feed days will ensure your metabolism gets a little shock to help it from lowering and gives you a 'fun day' to look forward to
- Intermittent Fasting
  - wk 1 & 2: eating window is 8 hours on days 1-3
  - wk 3 & 4: eating window is 8 hours on days 1-5

## Supplements

- Parasite cleanse kit of choice (optional) – since we're going low sugar, it's the perfect time to kill those pesky parasites causing havoc in your system. (take as directed on the label that you purchase).
  - o Should you do the parasite cleanse? If you already eat clean, you should be okay to do a parasite cleanse.
- Probiotic 20-50billion per capsule should be fine, but check with your doctor as to how much they think you may need. Personally I take 20-50 billion/caps.
- 1 tbls aloe - (easiest to add to a shake)
- 1 tbls glutamine 3 times a day - (breakfast, lunch and dinner)
- 5 grams BCAA pre-workout in water
- \*look for no sucralose, prefer stevia sweetened
- Digestive enzyme

(ensure it includes: pepsin, cellulose, HCL) – take before meat meals or large meals.

- Chlorella capsules or Royal jelly tablets (take as directed on the label). Both provide an array of vitamins, minerals and health fats. You do not need to buy both, but you can if you like. If you don't want to take either of these, you can take a high quality multi-vitamin instead

## Liquid Options

- Water
- Infused water
- Herbal teas - warm or chilled
- Sleepy Time Tea is a favourite amongst the TWL community to help with sleep
- Green & white teas - matcha is the best option with most antioxidants
- Organic coffee (max 2) one as pre-workout, one as necessary (if necessary) – zero is best.
- Natural Vitamin C or magnesium drinks (no sweeteners except stevia or xylitol) – once a day each as necessary

## Intermittent Fasting

- Food is consumed within an 8-hour window
- This does not apply to water, lemon water, chlorophyll water, unsweetened herbal teas etc.
- Eg.) First meal at 10am and last meal consumed by 6pm

## FAQ

### **Fermented Foods, what are they?**

- they are probiotic packed veggies that have been fermented and assist with gut health and give you a flat belly!
- Some of you may not love the flavour at first, but you will grow to either tolerate them or crave them - don't give up, there are plenty of different varieties out there to enjoy
- The most popular ones are sauerkraut (great for newbies) and kimchi (great for those who like

some spice)

### **Should you Add a Parasite Cleanse?**

- Parasite cleanses can work well when eating a low sugar diet, so a sugar cleanse can be a good time to do this type of cleanse.
- It can work well if you have a healthy colon and good bowel movements. It's important that you have good bowel movements prior to starting. When cleansing, toxins need a way out. If you are backed up, this could lead to toxins, parasites and candida getting stuck in the colon. Personally I add a colonic and some people add a lemon (also known as lemonas) or coffee enema to ensure things are moving along. You can do further research if you are interested in this.
- How to do it? You can research a good kit from a health food store and add it as a supplement. A fibre supplement and adequate liquids can also help.
- If eating clean is a new lifestyle change for you, I suggest a solid month of the following my eating plan along with a quality fiber intake or supplement and adequate water before any advanced cleansing happens in order to prevent a cleansing crisis

### **What about Water?**

- Your water goal is 2L plus workout water
- 1L of pure water (filtered)
- The other 2L can be your choice of BCAA's, herbal teas, fruit infused water, emergen -c or Mag-calm - make sure there are no artificial sweeteners or mystery ingredients

### **What is Intermittent Fasting (IF)?**

- Intermittent fasting (IF) is a term for an eating pattern that cycles between periods of fasting and eating – it is not a diet, but merely a way to describe an eating pattern that includes an eating window.
- Common intermittent fasting methods involve daily 16 hour fasts, or fasting for 24 hours, twice per week.

### **How to do Intermittent Fasting**

- There are several different IF methods used, but all of them involve splitting the day or week into “eating periods” and “fasting periods.”
- During the fasting periods, you eat either very little or nothing at all.
- The simplest, most sustainable and easiest method to stick to is the 16/8 method
- The 16/8 Method involves restricting your daily eating period to 8 hours, for example from 10am to 6pm then “fasting” for 16 hours in between.

### **Why try IF?**

- When you fast, several things happen in your body on the cellular and molecular level, but one of the most notable is the body's ability to change hormone levels to make stored body fat more accessible.
- IF also increases Human Growth Hormone (think muscle gain and fat loss), improves insulin levels (think better energy and fat loss) and allows your cells to repair themselves (think anti-aging and long term health)

### **Do not start IF or discontinue if:**

- If you notice abrupt changes in your menstrual cycle

- If you have problems with fertility and/or are trying to conceive
- You are underweight or have a history of eating disorders
- Do not have enough energy to carry out daily tasks after 4 days
- Have a history of diabetes or issues with regulating blood sugar and blood pressure

**What to expect when fasting?**

- Hunger (obviously) :)
- You may also feel weak and that your brain isn't performing as well as you're used to
- This may only be temporary, as it can take some time for your body to adapt to the new meal schedule.

\*If you have a medical condition, then you should consult with your doctor before trying intermittent fasting.

**What if I have an allergy or sensitivity to any of the foods, or I really dislike them?**

You are welcome to switch out a food. Just look at the recipe or package and change it out for something with similar macros. This month is lactose free, gluten free, so do not substitute with one of these foods. An example could be, someone that really does not like salmon, might be able to switch this out for chicken thighs. Both a good source of protein and high fat (fish has better fat), but all alternates won't be the exact same macros. Just do your best.
